

Turnkey Solutions For Advisors, Brokers, Proprietary Trading Groups And Hedge & Mutual Funds

Interactive Brokers is a global electronic broker that specializes in providing worldwide trade execution, clearing and specialized account structures that meet the needs of institutions of all sizes. Our focus on state-of-the-art automation allows us to offer superior executions, worldwide electronic access, sophisticated risk management tools, and trading technology designed by and for professionals, all at exceptionally low costs.

High costs eat away at your client's returns and ultimately diminish your business. Interactive Brokers specializes in providing the best executions; transparent, low commissions and financing rates to help you maximize your results. In fact, IB executions continue to outperform the industry. According to the Transaction Auditing Group, Inc. (TAG), a third-party provider of transaction analysis, Interactive Brokers' US stock and options price executions were significantly better than the industry¹ as a whole during the second half of 2013.

Interactive Brokers is also dedicated to providing our customers with direct market access to stocks, options, futures, forex, bonds, ETFs and CFDs from a single IB Universal Account. Trade in multiple currencies on over 100 market centers in 23 countries.

with direct market access to
stocks, options, futures, forex, bonds, ETFs and
CFDs from a single IB Universal AccountSM

Our sophisticated risk management tools include the IB Risk NavigatorSM, a real-time market-risk management platform that provides a comprehensive measure of risk exposure across multiple asset classes around the globe; and our real-time activity monitoring system, which lets you see real-time data that gives you the edge you need to react quickly to the markets.

In addition to our advanced trading tools, we offer securities financing services that take you from trade date to settlement. Our depth of availability, transparent rates, global reach, dedicated service representatives and automated lending and borrowing tools give institutions the advantages they need.

Our market maker-designed Trader Workstation (TWS) is our sophisticated yet highly customizable trading platform that allows financial professionals to trade worldwide from a

single account. With TWS, optimize your trading speed and efficiency, and access a wide variety of advanced trading tools that support any trading strategy. We remain dedicated to providing the most advanced tools available; in fact, we recently added a suite of advanced options trading tools, including the Options Strategy Lab, which lets you create and submit simple and complex multi-leg option orders that are based on your price or volatility forecast; and the Probability Lab, which offers a practical way of thinking about options without the complicated mathematics.

Interactive Brokers remains committed to providing Advisors, Brokers, Proprietary Trading Groups and Hedge and Mutual Funds with turnkey solutions based on sophisticated automated technology that maximizes returns and lowers costs.
